

Managing your Money

One of the key tips to start you thinking about budgeting is knowing how much money you may have, thinking about your costs and also your spending habits. Watch our short [presentation](#) about managing your money.

Income

- Information on tuition fees and government funding for new students is available on our [finance page](#).
- Many universities offer a range of scholarships, bursaries and awards to support students and recognise achievements - sometimes you will automatically qualify but very often you will need to apply. They do not need to be paid back but you may need to meet certain criteria to be eligible. Check what is [on offer](#).
- Have a go at our [Kahoot](#) - to test your knowledge on types of income for university and generated through part-time work.

Costs

- Depending on where you go to study the details will be different but check out our [costs of living in Winchester](#)
- There are a range of different lifestyle choices you will need to make regarding accommodation, how often you eat out and other items you personally choose to spend your money on. Take a look at our How to be a Savvy Student [blog](#) or ask our current students live via [Ask A Student](#) about their spending and what they wish they had planned for.
- Depending on the course you choose to study there may be different course costs - take a look at some general information about what is [included](#) and specific course pages for detailed costs.

More Information

- Whilst doing your research check out our student finance survival playlist on [Spotify](#)
- If there is anything else you are still not sure of please take a look at some [FAQ's](#).
