## 1 INTRODUCTION

- 1.1 This document summarises the credit requirements and the award and classification rules defined in the *Academic Regulations for Taught Programmes* and the *Academic Regulations for Postgraduate Research Programmes*. The Quality Office ensures that each Programme Specification matches an appropriate award calculation and classification pattern and provides advice to programmes that have queries about which pattern best suits their needs or whether a new pattern is required.
- 1.2 Where a new pattern is required, this may be approved via an exemption from the Academic Regulations or an amendment to the Academic Regulations, as determined by Academic Regulations, Policies & Procedures Committee and/or Senate Academic Development Committee, as appropriate.
- 1.3 Once a Programme has been (re)validated, the appropriate award and classification rules are logged into the University's student record system (SITS) by Registry staff to ensure that all awards are correctly calculated and classified, where appropriate.
- 1.4 The University operates a Credit Accumulation Transfer Scheme (CATS) in which modules have a national currency and the scheme is detailed Appendix 1 of the *Academic Regulations for Taught Programmes*. All references to credits in this document refer to CATS credits.
- 1.5 With effect from September 2017, the University shall implement a Grade Point Average (GPA) scheme for all modules taken at levels 4 – 6<sup>1</sup>. The GPA shall be recorded on each student's transcript and Higher Education Achievement Record (HEAR).

---

<sup>1</sup> This shall be phased in over three years starting with new students studying at level 4 only in September 2017, ie students studying at level 5 or above in September 2017 shall be outside the GPA.

## 2 CREDIT REQUIREMENTS FOR UNDERGRADUATE AWARDS

Where there is more than one Award Pattern for an award, eg A, B, C please refer to Section 4 below to confirm which pattern applies to which programme(s).

Award Code	Award Pattern	Year 1	Year 2	Year 3		Year 4

\* Up until September 2015, the Exam Board had discretion to condone one module of up to 20 credits or less. Where condonement was approved, the number of credits required at level 4 was reduced by the number of credits of the condoned module. From the start of 2015/16, condonement was replaced by compensation.

<sup>2</sup> If there are insufficient level 4 credits but the student has achieved credits at level 5 to replace the missing level 4 credits, these may be counted for the purposes of calculating an exit award without classification.

<sup>3</sup> If there are insufficient level 5 credits but the student has achieved credits at level 6 to replace the missing level 5 credits, these may be counted for the purposes of calculating an exit award without classification.

#### 4 AWARD CALCULATION AND CLASSIFICATION PATTERNS – CURRENTLY IN USE

Where there is more than one award pattern (eg BA (Hons) A – D), the table below lists which programme(s) use which calculation method.

Where there is only one award pattern listed, all programmes offering that award as a terminal or exit award will use the same calculation and classification pattern.

Where the Exam Board has approved one condoned module of up to 20 credits or less (in accordance with the Academic Regulations in force up until September 2015), the number of credits required at level 4 shall be reduced by the number of credits of the condoned module and the award and classification calculation shall be based on the remaining passed modules.

With effect from September 2016, an award based on the final mark shall be rounded to a whole number, in accordance with Section D3 of the Assessment Regulations.

Section 5 includes a list of award classification patterns which are no longer used because the programmes are no longer running

## 5 GRADE POINT AVERAGE (GPA)

- 5.1 A GPA shall be calculated for each undergraduate programme for which a student is registered or, in the case of a Continuing Education student, for all modules taken at levels 4 – 6.
- 5.2 The GPA is a mean average in which each module is counted equally according to its credit value, irrespective of level, subject or date taken. The weighted mean average shall be rounded to a whole number and converted to the equivalent GPA score according to the Mark Scheme in the *Assessment Regulations*.
- 5.3 The only module marks exempted from the GPA shall be:
- modules graded pass/fail only;
  - where a failed module is retaken or a replacement module is taken in an attempt to make good the failure, the lower mark achieved shall be excluded.

**Formula:** (credits x mark) + (credits x mark) etc  
= sum/total number of credits  
= % mark (rounded to a whole number)  
= GPA score (converted using Table 2 in Appendix 2 of the *Assessment Regulations*)

**Example:** A student takes six modules, of which one is a retake of a failed module:

Module	Credits	Module Mark
Module 1	15 credits	53%
Module 2	15 credits	56%
Module 3	30 credits	58%
Module 4	15 credits	UP (ungraded pass)
Module 5	15 credits	26%
Module 5 (retake)	15 credits	37%

**Calculation:**

$(15 \times 53) + (15 \times 56) + (30 \times 58) + (15 \times 37)$  [Module 4 and the first attempt at Module 5 are excluded in accordance with paragraph 5.3 above]  
= 795 + 840 + 1740 + 555  
= 3930/75  
= 52%  
= 2.50
