

ICT Acceptable Use policy guidance notes and further information

This guidance expands on the principles set out in the core regulations. It gives many examples of specific situations and is intended to help you relate your everyday use of the IT facilities to the *do's and don'ts* in the core regulations.

Where a list of examples is given, these are just some of the most common instances, and the list is not intended to be exhaustive.

1. Scope

1.1 Users

These regulations apply to **anyone** using the University of Winchester ICT facilities. This means more than students and staff. It could include, for example:

- Visitors to the University's website, and people accessing the institution's online services from off-campus
- External partners, contractor and agents based onsite and using the University's network, or offsite and accessing the institution's systems
- Students and conference guests using the University's computers, servers or network
- Visitors using the institution's Wi-Fi
- Students and staff from other institutions logging on using Eduroam

1.2 ICT facilities

The term ICT facilities include:

- IT hardware that the University provides, such as PCs, laptops, tablets, smart phones and printers.
- Software that the institution provides, such as operating systems, office application software, web browsers etc. It also includes software that the institution has arranged for you to have access to, for example, special deals for students on commercial application packages.
- Data that the University provides, or arranges access to. This might include online journals, data sets or citation databases.
- Access to the network provided or arranged by the institution. This would cover, for example, network connections in halls of residence, on-campus Wi-Fi, connectivity to the internet from University PCs.
- Online services arranged by the institution, such as Office 365 and Google Apps, JSTOR, or any of the Jisc online resources.
- IT credentials, such as the use of your institutional login, or any other token (email address, smartcard, dongle) issued by the University to identify yourself when using IT facilities. For example, you may be able to use drop-in facilities or Wi-Fi connectivity at other institutions using your usual username and password through the Eduroam system. While doing so, you are subject to these regulations, as well as the regulations at the institution you are visiting.

2. Governance

It is helpful to remember that using IT has consequences in the physical world.

Your use of IT is governed by IT specific laws and regulations (such as these), but it is also subject to general laws and regulations such as your institution's general policies.

2.1 Domestic law

Your behaviour is subject to the laws of the land, even those that are not apparently related to IT such as the laws on fraud, theft and harassment.

There are many items of legislation that are particularly relevant to the use of IT, including:

- [Obscene Publications Act 1959](#) and [Obscene Publications Act 1964](#)
- [Protection of Children Act 1978](#)
- [Police and Criminal Evidence Act 1984](#)
- [Copyright, Designs and Patents Act 1988](#)
- [Criminal Justice and Immigration Act 2008](#)
- [Computer Misuse Act 1990](#)
- [Human Rights Act 1998](#)
- [Data Protection Act 1998](#)
- [Regulation of Investigatory Powers Act 2000](#)
- [Terrorism Prevention and Investigation Measures Act 2011](#)
- [Counter-Terrorism and Security Act 2015](#)
- [Terrorism Act 2006](#)
- [Police and Justice Act 2006](#)
- [Freedom of Information Act 2000](#)
- [Freedom of Information \(Scotland\) Act 2002](#)
- [Equality Act 2010](#)
- [Privacy and Electronic Communications \(EC Directive\) Regulations 2003](#) (as amended)
- [Defamation Act 1996](#) and [Defamation Act 2013](#)

So, for example, you may not:

- Create or transmit, or cause the transmission, of any offensive, obscene or indecent images, data or other material, or any data capable of being resolved into obscene or indecent images or material.
- Create or transmit material with the intent to cause annoyance, inconvenience or needless anxiety.
- Create or transmit material with the intent to defraud.
- Create or transmit defamatory material.
- Create or transmit material such that this infringes the copyright of another person or organisation.
- Create or transmit unsolicited bulk or marketing material to users of networked facilities or services, save where that material is embedded within, or is otherwise part of, a service to which the user or their user organisation has chosen to subscribe.

- Deliberately (and without authorisation) access networked facilities or services.

2.2 Foreign law

If you are using services that are hosted in a different part of the world, you may also be subject to their laws. It can be difficult to know where any particular service is hosted from, and what the applicable laws are in that locality.

In general, if you apply common sense, obey domestic laws and the regulations of the service you are using, you are unlikely to go astray.

2.3 General institutional regulations

You should already be familiar with the University of Winchester's general regulations and policies. These are available on the University external website [here](#).

2.4 Third party regulations

If you use the University's IT facilities to access third party service or resources you are bound by the regulations associated with that service or resource. (The association can be through something as simple as using your institutional username and password).

Very often, these regulations will be presented to you the first time you use the service, but in some cases the service is so pervasive that you will not even know that you are using it.

Two examples of this would be:

- Using Janet, the IT network that connects all UK higher education and research institutions together and to the internet.
When connecting to any site outside the University of Winchester you will be using Janet, and subject to:
 - the [Janet Acceptable Use Policy](#)
 - the [Janet Security Policy](#)
 - the [Janet Eligibility Policy](#)

The requirements of these policies have been incorporated into these regulations, so if you abide by these regulations you should not infringe the Janet policies.

- Using Chest agreements
Eduserv is an organisation that has negotiated many deals for software and online resources on behalf of the UK higher education community, under the common banner of Chest agreements. These agreements have certain restrictions that may be summarised as: non-academic use is not permitted; copyright must be respected; privileges granted under Chest agreements must not be passed on to third parties; and users must accept the User Acknowledgement of Third Party Rights, available [here](#).

There will be other instances where the University has provided you with a piece of software or a resource subject to license agreements. Users must only use software and other resources in compliance with all applicable licences, terms and conditions. For information regarding specific license terms please contact the IT Services Helpdesk.

3. Authority

Authority to use the institution's IT facilities is granted by a variety of means:

- The issue of a username and password or other IT credentials.
- The explicit granting of access rights to a specific system or resource.
- The provision of a facility in an obviously open-access setting, such as an Institutional website; a self-service kiosk in a public area; or an open Wi-Fi network on the campus.

If you have any doubt whether or not you have the authority to use an IT facility you should seek further advice from the IT Services Helpdesk.

Attempting to use the IT facilities without the permission of the relevant authority is an offence under the Computer Misuse Act.

4. Intended use

The University of Winchester ICT facilities, and the Janet network that connects institutions together and to the internet, are funded by the tax-paying public. They have a right to know that the facilities are being used for the purposes for which they are intended.

4.1 Use for purposes in furtherance of institution's mission

The IT facilities are provided for use in furtherance of the University's mission. Such use might be for learning, teaching, research, knowledge transfer, public outreach, the commercial activities of the institution, or the administration necessary to support all of the above.

4.2 Personal use

You may normally use the IT facilities for personal use provided that it does not breach the regulations, and that it does not prevent or interfere with other people using the facilities for valid purposes (for example, using a PC to update your Facebook page when others are waiting to complete their assignments). However, this is a concession and can be withdrawn at any time.

Employees using the IT facilities for non-work purposes during working hours are subject to the same management policies as for any other type of non-work activity.

4.3 Commercial use and personal gain

Use of IT facilities for non-institutional commercial purposes, or for personal gain, such as running a club or society, requires the explicit approval of the Director of IT Services. The provider of the service may require a fee or a share of the income for this type of use. For more information, contact the IT Services Helpdesk.

Even with such approval, the use of licences under the Chest agreements for anything other than teaching, studying or research, administration or management purposes is normally prohibited, and you must ensure that licences allowing commercial use are in place.

5. Identity

Many of the IT services provided or arranged by the institution require you to identify yourself so that the service *knows* that you are entitled to use it.

This is most commonly done by providing you with a username and password, but other forms of IT credentials may be used, such as an email address, a smart card or some other form of security device.

5.1 Protect identity

You must take all reasonable precautions to safeguard any IT credentials issued to you.

You must change passwords when first issued and at regular intervals. Do not use obvious passwords,

and do not record them where there is any likelihood of someone else finding them. Do not use the same password as you do for personal (i.e. non-institutional) accounts. Do not share passwords with anyone else, even IT staff, no matter how convenient and harmless it may seem.

If you think someone else has found out what your password is, change it immediately and report the matter to the IT Services Helpdesk.

Do not use your username and password to log into websites or services you do not recognise, and only log into websites showing the locked padlock symbol (often in the address bar) or https:// at the beginning of the web address.

Do not leave logged-in computers unattended, and log out completely when you are finished.

Don't allow anyone else to use your smartcard or other security hardware. Take care not to lose them, and if you do, report the matter to the IT Services Helpdesk immediately.

5.2 Impersonation

Never use someone else's IT credentials, or attempt to disguise or hide your real identity when using the University's IT facilities.

It is acceptable not to reveal your identity if the system or service clearly allows anonymous use (such as a public facing website).

5.3 Compromising others' identities

You must not attempt to usurp, borrow, corrupt or destroy someone else's IT credentials.

6. Infrastructure

The IT infrastructure is all the underlying *stuff* that makes IT function. It includes servers, the network, PCs, printers, operating systems, databases and a whole host of other hardware and software that has to be set up correctly to ensure the reliable, efficient and secure delivery of IT services.

You must not do anything to jeopardise the infrastructure.

6.1 Physical damage or risk of damage

Do not damage, or do anything to risk physically damaging the infrastructure, such as being careless with food or drink at a PC.

6.2 Reconfiguration

Do not attempt to change the setup of the infrastructure without authorisation, such as changing the network point that a PC is plugged in to, connecting devices to the network (except of course for Wi-Fi or Ethernet networks specifically provided for this purpose) or altering the configuration of the University's PCs. Unless you have been authorised, you must not add software to or remove software from University PCs.

Do not move equipment without authority.

6.3 Network extension

You must not extend the wired or Wi-Fi network without authorization. Such activities, which may involve the use of routers, repeaters, hubs or Wi-Fi access points, can disrupt the network and are likely to be in breach of the Janet Security Policy.

6.4 Setting up servers

You must not set up any hardware or software that would provide a service to others over the network

without permission. Examples would include games servers, file-sharing services, IRC servers or websites.

6.5 Introducing malware

You must take all reasonable steps to avoid introducing malware to the infrastructure.

The term malware covers many things such as viruses, worms and Trojans, but is basically any software used to disrupt computer operation or subvert security. It is usually spread by visiting websites of a dubious nature, downloading files from untrusted sources, opening email attachments from people you do not know or inserting media that have been created on compromised computers.

If you avoid these types of behaviour you should not fall foul of this problem. When using your own personal computing equipment you must keep your antivirus software up to date and switched on, and run scans (where appropriate) on a regular basis.

6.6 Subverting security measures

The University of Winchester has taken measures to safeguard the security of its IT infrastructure, including things such as antivirus software, firewalls, spam filters and so on. You must not attempt to subvert or circumvent these measures in any way.

7. Information

7.1 Personal, sensitive and confidential information

During the course of their work or studies, staff and students (particularly research students) may handle information that comes under the Data Protection Act 1998, or is sensitive or confidential in some other way. For the rest of this section, these will be grouped together as protected information.

Safeguarding the security of protected information is a highly complex issue, with organisational, technical and human aspects. The institution has policies on Data Protection and information handling, available [here](#).

If your role is likely to involve handling protected information, you must make yourself familiar with and abide by these policies.

7.1.1 Transmission of protected information

When sending protected information electronically, you must use a method with appropriate security. Email is not inherently secure. Advice about how to send protected information electronically is available from the IT Services Helpdesk.

7.1.2 Removable media and mobile devices

Protected information must not be stored on removable media (such as USB storage devices, removable hard drives, CDs, DVDs) or mobile devices (laptops, tablet or smart phones) unless it is encrypted.

If protected information is sent using removable media, you must use a secure, tracked service so that you know it has arrived safely. Advice on the use of removable media and mobile devices for protected information is available at from the IT Services Helpdesk.

7.1.3 Remote working

If you access protected information from off-campus, you must make sure you are using an approved connection method that ensures that the information cannot be intercepted between

the device you are using and the source of the secure service.

You must also be careful to avoid working in public locations where your screen can be seen.

Advice on working remotely with protected information is available from the IT Services Helpdesk.

7.1.4 Personal or public devices and cloud services

Even if you are using approved connection methods, devices that are not fully managed by the University cannot be guaranteed to be free of malicious software that could, for example, gather keyboard input and screen displays. You should not therefore use such devices to access, transmit or store protected information.

Advice on the use of personal devices to access institutional services is available from the IT Services Helpdesk.

Do not store protected information in public cloud services, such as Dropbox.

7.2 Copyright information

Almost all published works are protected by copyright. If you are going to use material (images, text, music, software), the onus is on you to ensure that you use it within copyright law. This is a complex area, but the key point to remember is that the fact that you can see something on the web, download it or otherwise access it does not mean that you can do what you want with it. The University's policies regarding copyright material are available [here](#).

7.3 Others' information

You must not attempt to access, delete, modify or disclose restricted information belonging to other people without their permission, unless you have due authority.

Where information has been produced in the course of employment at the University, and the person who created or manages it is unavailable, the responsible line manager may give permission for it to be retrieved for work purposes. In doing so, care must be taken not to retrieve any private information in the account, nor to compromise the security of the account concerned.

Private information may only be accessed by someone other than the owner under very specific circumstances governed by institutional and/or legal processes.

7.4 Inappropriate material

The University of Winchester has a statutory duty under the Counter-Terrorism and Security Act 2015 Prevent strategy, the purpose of which is to aid the prevention of people being drawn into terrorism.

You must not create, download, store or transmit unlawful material, or material that is indecent, offensive, defamatory, threatening, discriminatory or extremist. The University reserves the right to block or monitor access to such material.

The University of Winchester has procedures to approve and manage valid, legal research activities involving such material, with the appropriate ethical approval. For more information, please refer to the Research and Knowledge Exchange Ethics information [here](#).

Other academic activities which involve material which may be considered indecent, offensive, defamatory, threatening, discriminatory or extremist must be notified to the Director of IT Services with explicit support from the relevant Dean. Conditions may be placed on the use of such material.

Authorised IT staff and others will be exempted when involved in the investigation of breaches of the regulations.

7.5 Publishing information

Publishing means the act of making information available to the general public or members of the University. This includes through the intranet, websites, social networks and news feeds. Whilst the University of Winchester generally encourages publication, there are some guidelines you should adhere to:

7.5.1 Representing the institution

You must not make statements that purport to represent the University without the approval of a member of the Senior Management Team.

7.5.2 Publishing for others

You must not publish information on behalf of third parties using the institution's IT facilities without the approval of the Director of IT Services or a member of the Senior Management Team.

7.5.3 The reputation of the University

You must not publish material that is false or misleading, or that would bring the University into disrepute.

7.5.4 Lobbying regarding internal policy or industrial relations

You must not use University IT facilities to lobby on any matter relating to University policy or industrial relations, including on any University internal or external sites and in particular the intranet staff or student announcement pages.

8. Behaviour

The way you behave when using IT should be no different to how you would behave under other circumstances. Abusive, inconsiderate or discriminatory behaviour is unacceptable.

8.1 Conduct online and on social media

The University's policies concerning staff and students also apply to the use of social media. These include human resource policies, codes of conduct, acceptable use of IT and disciplinary procedures.

Social media channels are a powerful resource and care should be exercised to protect the University image, assets and intellectual property; all users should also consider:

- Social media postings using the official University channels must be signed off and posted by the Digital Media Coordinator or Marketing and Communications Manager
- Other University-related posts using University social media channels must be of a satisfactory standard to represent the University
- University social media channels should not be used to express personal views that may be in conflict with University policies, standards or views
- When using personal social media channels, remember to state that your personal views do not represent those of the University to avoid misunderstandings
- Your use of University social media channels could leave the University open to litigation (for instance where there is discriminatory behaviour, harassment or bullying) and care should be exercised to avoid causing offence in any way.
- Any private view expressed using University social media (or private accounts that identify the user as being associated with the University) must not break the law or breach any University policy or code of conduct; personally-held views that could damage our business

interests or reputation must not be posted in a way that links the material to the University.

8.2 Spam

You must not send unsolicited bulk emails or chain emails other than in specific circumstances. Advice on this is available from the IT Services Helpdesk.

8.3 Denying others access

If you are using shared IT facilities for personal or social purposes, you should vacate them if they are needed by others with work to do. Similarly, do not occupy specialist facilities unnecessarily if someone else needs them.

8.4 Disturbing others

When using shared spaces, remember that others have a right to work without undue disturbance. Keep noise down (turn phones to silent if you are in a silent study area), do not obstruct passageways and be sensitive to what others around you might find offensive.

8.5 Excessive consumption of bandwidth/resources

Use resources wisely. Don't consume excessive bandwidth by uploading or downloading more material (particularly video) than is necessary. Do not waste paper by printing more than is needed.

9. Monitoring

9.1 Institutional monitoring

The University of Winchester monitors and logs the use of its IT facilities for the purposes of:

- Detecting, investigating or preventing misuse of the facilities or breaches of the University's regulations
- Monitoring the effective function of the facilities
- Investigation of alleged misconduct

The University will comply with lawful requests for information from law enforcement and government agencies for the purposes of detecting, investigating or preventing crime, and ensuring national security.

9.2 Unauthorised monitoring

You must not attempt to monitor the use of any IT services without explicit permission.

This would include:

- Monitoring of network traffic
- Network and/or device discovery
- Wi-Fi traffic capture
- Installation of key logging or screen grabbing software that may affect users other than yourself
- Attempting to access system logs or servers or network equipment

10. Infringement

10.1 Disciplinary process and sanctions

Breaches of these regulations will be handled by the University of Winchester's disciplinary processes for students and staff, available [here](#).

This could have a bearing on your future studies or employment with the University and beyond.

Sanctions may be imposed if the disciplinary process finds that you have indeed breached the regulations, for example, imposition of restrictions on your use of IT facilities; removal of services; withdrawal of offending material; fines and recovery of any costs incurred by the University as a result of the breach.

10.2 Reporting to other authorities

If the institution believes that unlawful activity has taken place, it will refer the matter to the police or other enforcement agency.

10.3 Reporting to other organisations

If the institution believes that a breach of a third party's regulations has taken place, it may report the matter to that organisation.

10.4 Report infringements

If you become aware of an infringement of these regulations, you must report the matter to the relevant authorities.
