Introduction & Summery

The University of Winchester, as a values -led institution which values our staff and is committed to equality, diversity and inclusion. We believe that diversity enriches our community, learning experience and global outlook and we are also committed to the belief that the wellbeing of individuals is important, as are their views and opinions. It is our stated strategic aim to celebrate and increase the diversity of our staff and students. To monitor, support and encourage underrepresented groups to ensure that opportunities are inclusive of sexual orientation, race, disability, religious affiliation and other characteristics.

We are proud to be Athena Swan Institution Bronze Award holders and Stonewall Champions and Disability Confident Committed employers. We also have an action plan in place to become part of the Mindful Employer initiative. We ask all staff to disclose their personal information to us in order that we can ensure that we always offer equal opportunities to all job applicants and current staff. The information that you provide us with helps us to decide on our priority areas for development while maintaining our vigilance and commitment to all the areas of equality performance; you will find our current targeted objectives in our Equality Strategy.

The historical breakdown shows that the proportion of male to female staff has continued around 60% female for the last 6 years, but has fallen by 1.3% since last year (59.6% from 60.9%). This is still higher than the HEFCE average of 54% female staff.

Research has the biggest gender imbalance but Professional Services runs it close (255 females (68.4%) to 118 males (31.6%) though this has improved from last year. Our Academic and Management employment areas all have gender ratios of around, or exactly, 50% females to males although there are greater variables when looked at from the perspective of pay grades.

6.2 Gender of Applicants and Appointees

Gender of applicants by university staffing groups

Staffing Group	Female		Male		Unknown		TOTAL
Academic	234	37.26%	373	59.39%	21	3.34%	628

TOTAL	1041	55.11%	797	42.19%	51	2.70%	1,889

The total number of applications remains similar to last year (female down from 55.5% to 55.1% and male staying at 42.2%). There has been little change in the percentage of females applying for Academic posts (37.3% down from 37.9%). Female applicants for Professional Services roles slightly increased by 1.5%.

TOTAL	100	56.50%	77	43.50%	0	0.00%	177

The appointments table shows that 56.5% of appointees were female (down from 61.7%). 60.3% of appointments made to Professional Services staff were female (down from 64.7%). There was a forty-five/fifty-five split in academic appointments but this still shows a greater number of female appointments than the application numbers might suggest.
